

COMPANY PROFILE

WHO ARE WE?

Patriot Technical Services (Patriot), founded in 2026, as a response to support growing demand for innovative and efficient solutions in Engineering, procurement and construction for vital projects in industrial, power, oil and gas, and technology by providing expertise and services as requested. Patriot Technical Services focuses on corporate growth and demonstrates dedication to our employees and clients.

Through a high-performing culture and approach to service delivery, we bring flexibility and innovative solutions to our clients across a wide range of sectors. The company has since provided tailored services to clients in public and private sectors.

Mission

To be the leading services contractor across industrial, power, oil & gas, and technology, delivering innovative projects with unmatched quality, safety, and integrity to empower our clients.

Vision

To be the pioneer in enduring industrial, power, oil & gas, construction, and technology solutions, revolutionizing these industries through steadfast commitment to our clients, employees, and communities

STRATEGY

- Reduce the total cost of ownership for our customers
- Nimble, agile, and adaptive to customers' needs
- Simplify engagement of critical services through vertical integration
- Integrator of proven technologies that improve service outcomes for customers
- Data-driven insights into all operations from HSE to field execution

CORE VALUES

- Safety
- Integrity
- Customer satisfaction
- Performance-minded

Our Commitment To **Creating a more secure and environmentally friendly future**

We believe that businesses can only succeed when they meet the needs of the present generation without compromising the ability of future generations to meet their own needs. Sustainability broadly indicates programs, initiatives, and actions to preserve a particular resource to support current and future needs. PTS operates under a Sustainability Management System (SMS)

SAFETY STRATEGY

We are fully devoted to fostering the success of our clients and employees while prioritizing safety as our utmost concern. Ensuring the well-being and safe return of every team member to their families and loved ones is of utmost importance to us.

QUALITY

We are committed to delivering high-quality, reliable, and timely solutions that meet and exceed client expectations. Through professionalism, innovation, and adherence to industry standards, Patriot Technical Services Ltd continues to build long-term partnerships and contribute to the success of our clients' operations

Safety Is Our Core Value as well

Empowering Safety rules & practices within our culture

At Patriot, we promote a positive culture based on passionate HSE leadership, accountability, and effective consultation with employees and relevant external parties. We ensure all personnel have clearly defined and understood responsibilities and accountabilities to implement our HSE policy and management system effectively.

zero harm through the belief that:

- All incidents can be prevented.
- We can perform our operations with minimal negative impact on the environment
- We can be of benefit to the greater community.

COMPANY ORGANISATION STRUCTURE

Our Services

Our services capabilities include.

Industrial and general supplies services

We offer comprehensive general supply services, delivering a diverse range of high-quality products to support both operational and project requirements. Our portfolio includes industrial consumables, mechanical, instrumentation and electrical requirements, personal protective equipment (PPE), office supplies, cleaning materials, and critical spare parts.

With a strong and trusted supplier network, we ensure consistent quality, competitive pricing, and timely delivery, even in remote or logistically challenging environments. Our supply solutions are tailored to enhance efficiency and ensure continuity of operations for our clients.

Instrumentation services

We provide specialized instrumentation services that support accurate measurement and control of industrial processes. Our scope includes the supply, installation, calibration, testing, and maintenance of instruments used to monitor parameters such as pressure, temperature, flow, and level.

Our team is experienced in loop checking, commissioning, troubleshooting, and calibration of field instruments in accordance with international standards. We focus on delivering precision, reliability, and compliance, enabling our clients to maintain optimal system performance and operational safety. Additionally, we offer.

- Power systems
- Fibre optic
- Security, fire & gas systems
- Substation Automation

Engineering services

Our engineering services are built on a foundation of technical excellence and practical industry experience. We provide end-to-end solutions covering installation, maintenance, repair, and optimization of mechanical and electrical systems.

Our capabilities include preventive and corrective maintenance, equipment servicing, fabrication works, system upgrades, and technical advisory services. We are committed to ensuring operational efficiency, safety compliance, and long-term asset reliability through cost-effective and innovative engineering solutions
